Eat smart scale app

CC0/qimono/Pixabay Timers and stopwatches are important tools for fitness and training programs, but they are also helpful for a variety of other activities. Stopwatch applications are available as standard programs on many smartphone devices. However, those looking for an easy-to-use stopwatch app that is a step above the basic offering should check out these 10 picks.Timeglass (iOS)Timeglass is one of the top rated apps for Apple devices. It has a minimalist design that makes it easy to navigate. You get to choose the color and sound themes to customize the app to your preferences. With the stopwatch feature, the time counts up so you can time your workout. Additionally, set single-use and repeat timers for other activities.CC0/stevepb/Pixabay Stopwatch Timer (Android)Stopwatch Timer for Android is designed for one-handed operation, so you can easily control it during a workout or other activities. It displays the time intervals in digital or analog format, recording minutes, seconds and milliseconds. The app allows you to store data to refer to later or send as a file through email, text or social networking.CC0/27707/Pixabay Multitimer (iOS)Multitimer is a step up from the basic countdown timer clock and stopwatch on the iPhone. The display has several circles on the main screen that you can customize to different timers and stopwatches. The basic app is free and offers a quality, reliable stopwatch, but the paid version unlocks other features. CC0/yellowcat/Pixabay Timer (Android)Timer has a clean, simple look and is easy to use. One of its top features is the widget, which you can place right on your home screen. You can start and stop the stopwatch or timer clock countdown without having to open the app.CC BY-SA 2.0/Ritesh Man Tamrakar/Flickr Tabata Stopwatch Pro (Android, iOS)Tabata Stopwatch Pro was designed with HIIT in mind. It helps you automate your workout with exercise, rest, cooldown and other intervals. It has a basic setup for people who are new to HIIT training, but is customizable for more advanced athletes with specific workout needs.CC0/tacofleur/Pixabay Google Clock (Android)Google Clock is perhaps the easiest stopwatch to use on Android devices. Simply start the stopwatch and click the “lap” button to record your lap times. Because the app was developed by Google, you can feel confident knowing that it will work seamlessly with smartwatch devices, too.CC0/StockSnap/Pixabay Stopwatch Timer (Windows)Stopwatch Timer for Windows devices is an easy-to-use stopwatch app with a minimalist design. Pin the stopwatch tile right on the home screen for quick and easy access. While using the app, the lock screen is temporarily disabled so you can access it quickly during a workout.CC0/StockSnap/Pixabay Timer+ (iOS)Timer+ is an upgrade from iOS’ basic Clock app. With Timer+ you can run multiple stopwatches at the same time and they all appear on the same screen. This app is optimized for use with Apple Watch, making it easy to use during exercise.CC0/fancycrave1/Pixabay Intervals (iOS)Intervals is a timer designed specifically for interval workouts. Unlike the above-mentioned app, you control this app using your Apple Watch, though it runs simultaneously on your iPhone. Other features include voice controls and pairing with the Health app.CC0/charlie0111/Pixabay Stopwatch and Timer (Android)Stopwatch and Timer for Android has been one of the top timer apps since 200It performs basic functions without a lot of extra features. Those who want more features can upgrade to the paid version. You can customize the look of the app and rename the different timers to meet your needs.CC0/LouAnnClark/Pixabay MORE FROM QUESTIONSANSWERED.NET While the first few days at home may feel like a vacation, not having a routine can quickly make life feel chaotic. Live a smarter, more healthy lifestyle with EatSmart's new integrated tracking app: set customized goals, activate your virtual trainer, estimate body fat, water, muscle and bone mass, all while using our easy fitness program with progress-based achievements.Integrates with Apple Healthkit Apr 16, 2019 Version 1.1.10 Updated alerts, improved data synchronization and device compatibility. The app stopped working for me late February 2022. I called Support and was told that the developers knew about the problem and were working on it. Late March 2022, I called again and was given the same story. I voiced my surprise that a month had passed with no resolution. I was put on a brief hold, and upon return the support staff told me that they had discontinued the app. They offered a remedy of sending me a new scale, but their product line no longer included a scale with Bluetooth. They said they would report this problem to the app development team. I asked why they had a app development team for a discontinued app and was told that future scales would have an app. I asked to be put on the waiting list for that product and was told that was not possible. They suggested that I watch for a new scale with an app and then call them to request a replacement scale at which time they would make a decision. It seems pretty clear to me that they’re doing these gymnastics simply to generate more sales. Avoid this company! The app no longer works. I’m glad someone else posted the same review. I contacted customer service who replied saying “uninstall and reinstall” Thanks for the support… I tried that before contacting you.It was interesting to see comments about someone speaking with customer service and being told it was discontinued and a new app/scale being developed. They already did that once. Which is how I got this “new” scale (after throwing a fit!) that no longer works.What a poor business model and customer service to go through this every 2 years. No more, Taylor products! Read the most recent reviews. If you purchased this scale to be able to track your results on your smart phone do not buy this product. The ‘smart scale’ functionality does not work and the software is no longer being supported. Additionally, the product has been discontinued. The scale worked ok and connnected to my iPhone 7 in the beginning but then would no longer connect or recognize my login credentials. The scale still works as a scale but without the connectivity that I purchased it for. The developer, Taylor Precision Products, Inc., has not provided details about its privacy practices and handling of data to Apple. For more information, see the developer’s privacy policy. The developer will be required to provide privacy details when they submit their next app update. Developer Website App Support Privacy Policy | CC0/langll/Pixabay Whether you’re traveling for business, pleasure or something in between, getting around a new city can be difficult and frightening if you don’t have the right information. In today’s digital world, you have all of the information right there at your fingertips, especially if you’ve downloaded one of these 10 innovative apps that will help you get around. Best of all, each app is available for both iOS and Android devices.iExitDo you love taking road trips (or have to take them for work)? If so, you can’t go another day without iExit. When you’re driving along a major interstate and you’re looking for a gas station, certain type of restaurant, welcome center, bathroom, hotel, hospital, drug store or any other place where you may need to make stop, you can simply pull up iExit and find it. The app breaks down each exit on most major interstates in the United States. CC0/KatieBethToday/Pixabay Google Maps Google Maps has been around for years, but it still reigns supreme when it comes to getting around town. Find out what kind of public transportation is offered in the area, which points of interest are nearby and even how crowded those restaurants and shops you want to visit are at that exact moment. Get directions to your next destination, and find out how long it will take to get there via car, foot, public transit or bike. CC0/Publicco/Pixabay Mobile Passport Anyone traveling internationally will want to download the Mobile Passport app. Use your phone to scan your passport information, and you can skip the customs lines. While it’s authorized for use by US Customs, keep in mind that it’s only accepted at about 24 airports, and you must be an American or Canadian citizen, though those numbers are sure to grow. CC0/Cytis/Pixabay FLIONo one really looks forward to a delayed flight, but if you find yourself enjoying a layover, FLIO can help you navigate the airport for everything you need to stay comfortable. Find out how to use the Wi-Fi, where the lounges are, what there is to eat in the area and how to get from place to place among other important information. CC0/Katyveldhorst/Pixabay GasBuddy If you prefer driving over flying to your destination, GasBuddy can be your best friend. It’s available in the United States, Australia and Canada, and you can use the app to search for gas stations near your location and compare prices to find the cheapest gas in the vicinity. CC0/Skitterphoto/Pixabay HotelTonight For some people, there’s nothing worse than being stuck in an unfamiliar city and having to book a hotel at the last minute. For others, that’s part of the thrill of a road trip. No matter which side of the issue you fall on, HotelTonight helps you find same-day hotel reservations in the city where you’re staying, and those bookings usually come with some decent discounts. CC0/Bottlein/Pixabay UberYou’re probably already familiar with Uber, but if you aren’t, the app is a must for your next travel date. The ridesharing service is available in over 84 countries and hundreds of cities around the globe. When you have no idea where you’re going, how to get there or you simply don’t want to navigate traffic in a new place, it’s a trusty standby you can rely on practically anywhere. It also comes in handy when you’ve had a bit too much to drink or those new shoes rubbed blisters on your feet and you can’t get back to your hotel. CC0/Free-Photos/Pixabay Google Trips Google Trips is a newer app, but it works seamlessly with apps like Google Maps, Gmail and Calendar to put together an itinerary for your next trip. It searches for information like flight details, hotel reservations and car rental receipts and provides you with a list of things you may like to do in the city you’re traveling to. You can also manually select a destination city, and let the app put together a list of things that might interest you there. SidekixIf you find yourself with a little downtime in a particular city, Sidekix can guide you towards something fun and exciting to do. From Amsterdam to Warsaw, with dozens in between, you can get a glimpse at some “best of” guides cities around the world. Looking for the best seafood restaurant in Boston or the best museum in Havana? You’ll find it on Sidekix. CC0/StockSnap/Pixabay YelpNo matter where you go, you have to eat, and finding the best place in town isn’t always easy. Yelp is an international tool filled with reviews of local restaurants in cities across the globe. It’s more useful in some countries than others, and within the United States, you’ll find more reviews for restaurants in bigger cities than you will the country, but you’ll get honest feedback on whether or not locals and other travelers recommend a place to eat.
